"One of the most interesting things about the Clearview solution is the extent to which Clearview leverages Microsoft Office SharePoint Server and the Office 2007 system – not just as a platform for delivering core ECM functionality – but also as part of the core user experience.

The integration of SharePoint Server and the Office system is pretty much seamless and delivers the power of both the SharePoint Server and Office system document management features in a very comprehensive, Microsoft-oriented user

Ron Sielinski
Senior Product Manager
Microsoft Office Business Platform

Clearview enables your organization to confidently and securely capture, manage, and access your critical business documents. With the advanced Enterprise Content Management (ECM) functionality in Clearview, you can eliminate lost or misfiled documents while improving key business processes and enhancing workplace productivity. In today's compliance and regulatory governed business landscape, Clearview gives you the increased ability to meet these demanding and challenging business requirements—those you face today, as well as those you'll face tomorrow.

EXTREME PERSONALIZATION FOR INCREASED EFFICIENCY

My File Cabinet and My Subscriptions are examples of personal user functionality that was designed to provide fast access to the files and content information workers use as a part of their daily work environment. No other system delivers this level of end-user functionality and personalized approach to content access and utilization.

INTELLIGENT ORGANIZATION, INTELLIGENT FOLDERS

iFolders™ provide an advanced organizational method within Clearview to uniquely store and arrange information, files, and documents the way you and your business work. No other system provides this level of information organizational intelligence.

ADVANCED DOCUMENT TRACKING SERVICES

The innovative design of Clearview provides a rich set of features to secure document accuracy, completeness of files, and appropriate filing location. Clearview provides the tools you need for a complete document and file tracking solution, including automated system reports and visual alerts for missing documents during file access.

SIMPLE, STREAMLINED SYSTEM ADMINISTRATION

Clearview has the most powerful and flexible System Manager module on the market. With optional Active Directory Integration, System Administrators have the option to maintain a single set of user profiles on their network or maintain individual organizational unit, group, and user records within Clearview.

Document and file administration are also managed in a way never before seen in legacy systems. The Clearview repair queue enables users to submit repair requests for changes and updates that need to be made to documents. Requests are then monitored and maintained by the appropriate document administration personnel.

ELIMINATE COMPLIANCE, AUDIT, AND EXAMINATION HEADACHES

The advanced audit and tracking capabilities in Clearview are designed for today's compliance and regulatory-sensitive business world. Every single system and user operation in Clearview can be audited—that's the Clearview difference.
