Clearview Announces Signing of Wall Street Network to Clearview Partner Program

Microsoft Certified Technology Solutions Provider Selects Clearview ECM as their Content Management Offering

Auburn Hills, MI, February 27, 2008 – Clearview Software, the premier innovators of contemporary Microsoft® SharePoint® based Enterprise Content Management (ECM) solutions designed exclusively for Microsoft technology environments, is pleased to announce that Wall Street Network, a Microsoft Certified Partner, has joined the Clearview Partner Program. Under the terms of the partnership agreement, Wall Street Network will be offering the Clearview ECM suite to customers and prospects of their technology services.

As a SharePoint solutions provider, Wall Street Network had envisioned building out a rich ECM offering for their clients with SharePoint as the development platform. Once they investigated Clearview, they felt the strength of Clearview's SharePoint-based ECM suite would fully satisfy the information and data management requirements of their clients.

Wall Street Network is a technology solution provider (computer systems integrator) with products and professional services that deliver cost effective, high-value solutions. They offer a full suite of professional services and consulting, encompassing all phases of a project lifecycle—strategy, assessment, planning, implementation and integration, and ongoing operational support. Their application integration, development skills, and competencies include enterprise solutions for Content Management, Contact Relationship Management, Enterprise Resource Planning, Geographic Information Systems, and Business Intelligence.

"Prior to partnering with Clearview, we conducted research on the small and medium business clients and prospects that have not yet implemented ECM, and found that only twenty percent of their storage space is shared information while eighty percent of their unstructured electronic storage is accessible to one and only one person. We think it should be the other way around, and plan to aggressively market the Clearview solution to help clients and prospects improve data accessibility and collaboration," said Lester Pierre, Chairman and Founder of Wall Street Network. "We think that Clearview has got ECM right, with an incredible ease of use, for at least the straightforward tasks. That's a real plus. You are not looking at weeks of development and configuration as is required for other ECM solutions. With Clearview, it's more like hours."

"We are extremely pleased to have Wall Street Network represent Clearview's ECM suite," said Steve Leichtman, Senior Vice President of Sales for Clearview Software. "With Wall Street Network's SharePoint expertise and solutions delivery methodology, we know customers will receive the highest levels of quality sales, services, and support for their Clearview implementations."

Clearview has introduced a fresh approach to ECM that uniquely leverages the native ECM capabilities of SharePoint as core components of the Clearview ECM suite architecture. By extending SharePoint with transactional document imaging, report management (COLD), and business process management, Clearview delivers enterprise-class ECM functionality that rivals legacy ECM products. Furthermore, the Office 2007 user experience provided throughout the Clearview client interface provides information workers with a familiar Microsoft experience designed to promote ease-of-use and rapid adoption of ECM on every worker desktop.
