Clearview Announces Addition of Dataimage to Clearview Authorized Partner Network

Experienced Document Management Solutions Provider to Offer SharePoint-based Clearview ECM Suite

Auburn Hills, MI, May 12, 2008 – Clearview Software, the premier innovators of contemporary Microsoft® SharePoint® based Enterprise Content Management (ECM) solutions designed exclusively for Microsoft technology environments, is pleased to announce that Dataimage, a leading document management solutions provider located in Salt Lake City, Utah, has joined the Clearview Authorized Partner Network. Under the terms of the partnership agreement, Dataimage has agreed to represent, support, and deliver the Clearview suite, a comprehensive SharePoint-based ECM solution, to new customers throughout the Western United States.

Dataimage offers customized document management solutions, from a single product to a complete system of scanners, software, storage equipment, and technical support. When Dataimage identified SharePoint as an industry-leading and growing solution in the market, they turned to Clearview to help them deliver a comprehensive SharePoint-based ECM solution.

"We are very excited about our new strategic partnership with Clearview, which will allow us to focus on an emerging portion of the ECM market. Microsoft SharePoint is quickly establishing itself as an industry-leading solution, and we see Clearview uniquely positioned as one of the only solutions that has truly adopted SharePoint as a cornerstone of their ECM platform," said Dan Dillingham, Vice President of Corporate Sales for Dataimage. "Clearview will allow Dataimage to deliver a comprehensive SharePoint-based ECM suite, which leverages all of the functionality native to SharePoint, including Forms Management, E-mail Management, and Web Content Management, combined with traditional Document Imaging, Document Management, and Reports Management."

The Clearview *Iriss* Desktop Gadget, the world's first ECM gadget providing a new and simple user experience and basic content management services on every desktop, also drew the attention of Dataimage. "The Clearview *Iriss* Desktop Gadget takes ease of use to a whole new level," said Dan Dillingham. "Clearview truly is a next-generation approach to ECM."

"We are extremely pleased to have Dataimage offer the Clearview ECM suite as part of a comprehensive, SharePoint-based ECM solution," said Steve Leichtman, Senior Vice President of Sales for Clearview Software. "With Dataimage's exceptional document management expertise and solutions delivery methodology, we know customers will receive the highest levels of quality sales, services, and support for their ECM implementations."

Clearview has introduced a fresh approach to ECM that uniquely leverages the native ECM capabilities of SharePoint as core components of the Clearview suite architecture. By extending SharePoint with transactional document imaging, report management (COLD), and business process management, Clearview delivers enterprise-class functionality that rivals legacy ECM products. Furthermore, the Office 2007 user experience provided throughout the Clearview client interface provides information workers with a familiar Microsoft experience designed to promote ease-of-use and rapid adoption of ECM on every worker desktop.

###

About Dataimage

Headquartered in Salt Lake City in 1980, Dataimage is an industry leader providing solutions that capture, store, preserve, and deliver content and documents related to organizational processes. These solutions include tools and strategies that allow the management of an organization's business-critical information, wherever that information exists.
