Clearview Announces Addition of Tallega Software to Clearview Authorized Partner Network

Information Capture Services Provider to Offer SharePoint-based Clearview ECM Suite

Auburn Hills, MI, June 2, 2008 – Clearview Software, the premier innovators of contemporary Microsoft® SharePoint® based Enterprise Content Management (ECM) solutions designed exclusively for Microsoft technology environments, today announced the addition of Tallega Software, a world-class provider of document capture technology, content management solutions, and consulting services, to the Clearview Authorized Partner Network. Under the terms of the partnership agreement, Tallega will represent, deliver, and support the Clearview ECM suite to their customers as part of a comprehensive SharePoint-based ECM solution.

Tallega is a solution provider specializing in helping small, medium, and large businesses purchase, implement, and support information capture and content management solutions that seamlessly fit their unique business requirements. After identifying the growth of Microsoft SharePoint in the ECM industry, Tallega turned to Clearview to add a unique, SharePoint-based ECM solution to their portfolio.

“We looked at several products that integrate with SharePoint, but Clearview is the only product we’ve found that truly encapsulates SharePoint as a platform and not simply a repository,” said David Gerber, President of Tallega Software. “SharePoint is causing customers to look at content management in new ways, and Clearview is leading that innovation. We are proud to partner with Clearview for several reasons: the product is a great fit for the SharePoint market; the product delivers on its promises; and the team is a quality group of industry veterans.”

“We are pleased to welcome Tallega Software to our Partner Network and look forward to them offering the Clearview ECM suite as part of their rich solution portfolio,” said Phil Pascarelli, President of Clearview Software. “Their exceptional document capture and content management solutions delivery combined with their outstanding consulting and support services make us very confident that Tallega will be a valuable member of our Partner Network.”

Clearview has introduced a fresh approach to ECM that uniquely leverages the native ECM capabilities of SharePoint as core components of the Clearview suite architecture. By extending SharePoint with transactional document imaging, report management (COLD), and business process management, Clearview delivers enterprise-class ECM functionality that rivals legacy ECM products. Furthermore, the Office 2007 user experience provided throughout the Clearview client interface provides information workers with a familiar Microsoft experience designed to promote ease-of-use and rapid adoption of ECM on every worker desktop.

###

About Tallega Software

Tallega Software specializes in helping businesses purchase, implement, and support “the right” information capture, content management, and workflow solution guaranteed to reduce operational costs, increase productivity and enhance regulatory compliance.
