For Immediate Release

Clearview Announces Addition of The Spitfire Group, Inc. to Clearview Authorized Partner Network

Spitfire and Clearview Collaborate to Help Companies Benefit from Microsoft SharePoint

Auburn Hills, MI, August 19, 2008 – Clearview Software, the premier innovators of contemporary Microsoft® SharePoint® based Enterprise Content Management (ECM) solutions designed exclusively for Microsoft technology environments, today announced the addition of The Spitfire Group, Inc., a consulting firm specializing in business-driven technology solutions and integration, to the Clearview Authorized Partner Network. Under the terms of the partnership agreement, Spitfire will incorporate Clearview into their solution portfolio as their premiere ECM partner solution to maximize the full value and potential of SharePoint.

Spitfire specializes in helping clients achieve alignment between business objectives and technology initiatives. With a business-focused approach and highly-experienced team, Spitfire helps clients maximize project effectiveness and regularly delivers client engagements under budget. Their SharePoint knowledge and experience enabled them to identify Clearview's unique value proposition of leveraging and extending SharePoint to deliver enterprise-class ECM functionality.

"The Spitfire Group is excited to work as the Rocky Mountain partner for Clearview because we know how much value Microsoft SharePoint and an ECM tool bring to an organization," said Mark Richtermeyer, President and CEO of Spitfire. "Our SharePoint expertise can extend the Clearview capabilities in order to maximize an organization's return on software investments."

"We welcome The Spitfire Group to the Clearview Authorized Partner Network," said Steve Leichtman, Senior Vice President of Sales & Services for Clearview Software. "The expertise and business application knowledge that Spitfire brings to their market is highly regarded and Clearview is proud to have our ECM platform selected for their clients."

Clearview has introduced a fresh approach to ECM that uniquely leverages the native ECM capabilities of SharePoint as core components of the Clearview suite architecture. By extending SharePoint with transactional document imaging, report management (COLD), and business process management, Clearview delivers enterprise-class ECM functionality that rivals legacy ECM products. Furthermore, the Office 2007 user experience provided throughout the Clearview client interface provides information workers with a familiar Microsoft experience designed to promote ease-of-use and rapid adoption of ECM on every worker desktop.

###
