## Press Release

For Immediate Release

### Clearview Announces Release of Clearview ECM 5.0

#### *The Industry's First SharePoint-based ECM Solution Adds Business Process Management and more*

**Auburn Hills, Michigan November 4, 2008.** Clearview Software—the leading provider of Enterprise Content Management (ECM) solutions that complement and extend Microsoft technologies including SharePoint—proudly announces the release of Clearview ECM 5.0, bringing to market their new Business Process Management module as well as intelligent indexing and index validation, external data access, compatibility with Kofax 8.0, and more.

The fully-integrated Business Process Management module (workflow) reduces implementation costs while automating content-centric processes to improve user productivity, information sharing, and collaboration of documents in Clearview and SharePoint. Information workers can manage and monitor workflow activity from the intuitive Clearview Client, which was inspired by the Fluent User Interface in Microsoft Office 2007.

“Organizations will be able to leverage the tremendous efficiencies provided by a solution built on a content-centric business process management product,” says Clearview Channel Services Manager Daniel Mayernik. “The Clearview 5.0 Ultimate Edition delivers the unique advantage of content-centric business process management—the content that drives business processes. Clearview provides built-in support for content events, enabling new content added to any of the Clearview Virtual ECM Domain repositories to trigger a new workflow or complete a current workflow, based on an organization’s unique business rules and policies.”

With Clearview EMC 5.0, no data is left behind. Upgraded to 64-bit, Clearview continues to extend enterprise-class content management capabilities to SharePoint and can also connect to external data sources such as an ODBC database or flat file for quick look-ups of data throughout the enterprise. Document Management Customers will also find that the new compatibility with Kofax 8.0 enables rapid document class synchronization.

###

#### **About Clearview Software**

Clearview Software is the premier innovator of contemporary Enterprise Content Management (ECM) solutions that help organizations in all lines of business control, secure, and manage information assets; enhance operational process efficiency; and strengthen overall regulatory and compliance initiatives. By encapsulating Microsoft® SharePoint®, Clearview extends the core ECM capabilities provided by SharePoint with Enterprise-class document imaging, and high-value content services to deliver an unprecedented ECM suite built exclusively for the Microsoft technology environment.
